Advantages of buying Palladium rather than 14KT white Gold:											
1. No Discoloration: The natural color of Palladium is Platinum white.											
2. Gold weighs 25% more: The heavier the item is, the more its costs.											
3. Higher preceived value: Palladium is 23kt where White gold is only 10 or 14kt.											
4. Palladiun and Platinum are from the same family of metals, PGM's.											
The pricing quoted is at \$350.00/oz Palladium.											
The MSRP is Triple X.											

Price of PD is at 275.00
(260.00+15.00)
